

# MAX-D™ IS HD AUDIO

## MAX-D IS THE FUTURE OF ALL THINGS AUDIO.

MAX-D is an audio process that *makes everything sound better*, without ever increasing its original file size.

## MAX-D IS PURE AUDIO CLARITY.

Invented by Lloyd Trammell, one of the original creators of the first working surround sound systems, MAX-D is an accumulation of his life's work.

## MAX-D IS A SIMPLE PLUG AND PLAY SOLUTION.

Any manufacturer who cares about sound quality can easily adopt the MAX-D Technology into its products. No matter what you prefer [Bose®, Apple®, Dolby® or Beats®], MAX-D can bring these brands closer to *true-audio-perfection!*

## MAX-D - ANYWHERE AUDIO CAN GO, SO CAN MAX-D!

Is MAX-D the NEXT DISRUPTIVE technology? Think about it - did Apple's®, Tesla's®, Netflix's® or Intel's® initial stock price reflect their revenue potential? Whether it's better audio communication in mobile devices, smarter automobiles, stronger voice recognition or simply a vastly enhanced entertainment experience MAX-D has the right application for any audio product.

## MAX-D TRADES UNDER THE STOCK SYMBOL: MAXD

The MAX-D headquarters is located right in the heart of the who's-who in tech, and with it's recent adoption into the Qualcomm's Snapdragon Chip and Akyumen's HD Android devices, MAX-D is poised to fulfill it's goal on becoming the **worlds first consumers audio brand.**

## MAX-D - ANYWHERE AUDIO CAN GO, SO CAN MAX-D!
